

# April 2006 Newsletter

[www.oaog.ca](http://www.oaog.ca)

We are now soliciting all OAG members to offer articles, stories, technical essays or any other astro related projects or writings for a newly formatted Newsletter soon to be published.

With a 900+ membership, and a vast array of special interests in astronomy, the single biggest resource in the OAG is the membership. Reformatting the Newsletter in this way will tap into this vast membership resource, raise readership, discussion, and involvement. It will be published on the [oag.ca](http://oag.ca) website in PDF format and will also be available at the gabfest as a hard copy for free, or for a small fee to cover the costs we will mail it to you via Canada Post.

So here's your chance to share your experiences, knowledge, photographs, sketches or special projects for all to read and enjoy. Please submit your essays in an editable format (for layout purposes) and include all accompanying photos, drawings, sketches.

Send this to [oag.newsletter@sympatico.ca](mailto:oag.newsletter@sympatico.ca)

Thanks!

Your OCV
